Manuals dealing with human subjects must contain a statement indicating that the study was approved by the Institutional Review Board or comparable formal research ethics review committee. If none is present at your institution, there should be a statement that the research was performed according to the Declaration of Helsinki principles (www.wma.net/e/policy/ethics.htm). There should also be a statement about whether informed consent was obtained from research subjects.

Results
Present these clearly, concisely, and without comment.

Discussion
Explain your results and relate them to those of other authors; define their significance for clinical practice.

References
Only essential references should be cited. If there are six or fewer authors, all should be listed. If there are seven or more, list the first three and then **“et al.”** the rest. The list should be in order of first appearance in the text. Only numerals should be cited in the text. Journal names should be abbreviated according to MEDLINE (http://www.ncbi.nlm.nih.gov/journals?itool=sidebar).

Journal article

Books

Tables
Tables should have a title and footnotes explaining any abbreviation used in that table. Lowercase letters (a, b, c, ...) should be used for referenced footnotes.

Figures
All figures should be cited in the text and figure parts should be identified by lowercase letters (e.g., Figure 1a). Graphs and drawings are regarded as figures.

Electronic formats
Scan resolution: Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.

Color illustrations: Store color illustrations as RGB (8 bits per channel) in TIFF format.

Vector graphics: Fonts used in vector graphics must be included. Do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size. Vector graphics exported from a drawing program should be stored in EPS format; the EPS file must always contain a preview of the figure in TIFF. Suitable drawing programs include Freehand, Illustrator, Corel Draw, and Designer.
Contents

MAGNETIC RESONANCE IMAGING

CHEST IMAGING

BREAST IMAGING
457 Original article. The role of apparent diffusion coefficient values in the differential diagnosis of breast lesions in diffusion-weighted MRI. C. Şahin, E. Arıbal

PEDIATRIC RADIOLOGY
488 Pictorial essay. Three-dimensional CT imaging in pediatric calvarial pathologies. Y. Pekçevik, E. Hasbay, R. Pekçevik

ABDOMINAL IMAGING
479 Review. MRI of diffuse liver disease: the common and uncommon etiologies. S. Chundru, B. Kalb, H. Arif-Tiwari, P. Sharma, J. Costello, D. R. Martin

LETTER TO THE EDITOR

518 Endovascular manual aspiration thrombectomy of acute superior mesenteric artery thromboembolic occlusion: the good, the bad, and the ugly. U. G. Rossi, P. Rigamonti, M. Dahmane, M. Cariati
