Instructions for Authors

Manuscript submission is online at www.dirjournal.org. Please refer to the detailed Instructions for Authors at www.dirjournal.org and use them as a checklist.

Scope

Diagnostic and Interventional Radiology is a medium for disseminating scientific information based on research, clinical experience, and observations pertaining to diagnostic and interventional radiology.

• This journal is in compliance with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals, as published by the International Committee of Medical Journal Editors (updated August 2013, www.icmje.org). Any clinical trials must be registered as outlined in the ICMJE guidelines.

• For studies reporting diagnostic accuracy, please refer to the Standards for Reporting of Diagnostic Accuracy (STARD) checklist at http://www.stard-statement.org/.

The author(s) MUST sign, scan and e-mail the Copyright Transfer Form within three days AFTER their manuscript’s acceptance for publication (info@dirjournal.org). Otherwise online or print publication will not be made.

Form of manuscript

Papers must be in English and presented in the following order:

• Title of the manuscript
• Abstract (250 words or less, structured for original articles)
• Text of paper
• Acknowledgements
• Conflict of interest disclosure
• References
• Tables (numbered with Arabic numerals; 1, 2, 3, etc.), prepared on separate sheets
• Figure legends (numbered consecutively using Arabic numerals)

Please use appropriate subheadings and arrange your text as follows:

Abstract

The abstract should contain four sections (for original articles only): Purpose; Methods; Results; Conclusion. Each section should comprise one paragraph, beginning with the name of the section in uppercase letters, followed by a colon: (PURPOSE: To report examples of ...)

Introduction

State briefly the nature and purpose of the work, quoting the relevant literature.

Methods

Include the details of clinical and technical procedures.

Research ethics standards compliance

All manuscripts dealing with human subjects must contain a statement indicating that the study was approved by the Institutional Review Board or comparable formal research ethics review committee. If none is present at your institution, there should be a statement that the research was performed according to the Declaration of Helsinki principles (www.wma.net/e/policy/b3.htm). There should also be a statement about whether informed consent was obtained from research subjects.

Results

Present these clearly, concisely, and without comment.

Discussion

Explain your results and relate them to those of other authors; define their significance for clinical practice.

References

Only essential references should be cited. If there are six or fewer authors, all should be listed. If there are seven or more, list the first three and then “et al.” the rest. The list should be in order of first appearance in the text. Only numerals should be cited in the text. Journal names should be abbreviated according to MEDLINE (http://www.ncbi.nlm.nih.gov/journals/ftool-sidebar).

Journal article

Books

Tables

Tables should have a title and footnotes explaining any abbreviation used in that table. Lowercase letters (a, b, c, ...) should be used for referenced footnotes.

Figures

All figures should be cited in the text and figure parts should be identified by lowercase letters (e.g., Figure 1a). Graphs and drawings are regarded as figures.

Electronic formats

Scan resolution: Scanned line drawings should be digitized with a minimum resolution of 800 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.

Color illustrations: Store color illustrations as RGB (8 bits per channel) in TIFF format.

Vector graphics: Fonts used in vector graphics must be included. Do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size. Vector graphics exported from a drawing program should be stored in EPS format; the EPS file must always contain a preview of the figure in TIFF. Suitable drawing programs include Freehand, Illustrator, Corel Draw, and Designer.
