Turkish Society of Radiology is one of the foremost medical specialty organizations in Turkey. It was formed by the merger of the two main radiology societies of Turkey, one of which was founded in 1924. The Society is based in Ankara, Turkey.
Overview
Diagnostic and Interventional Radiology (Diagn Interv Radiol) is a medium for disseminating scientific information based on research, clinical experience, and observations pertaining to diagnostic and interventional radiology. The journal is the double-blind peer-reviewed, international, bimonthly, open-access publication organ of the Turkish Society of Radiology. Diagnostic and Interventional Radiology is currently indexed by Science Citation Index Expanded (2016 IF: 1.892) and PubMed MEDLINE.

Editorial and publication processes of the journal are shaped in accordance with the guidelines of the international organizations such as the International Committee of Medical Journal Editors (ICMJE), the World Association of Medical Editors (WAME), the Council of Science Editors (CSE), the Committee on Publication Ethics (COPE), and the European Association of Science Editors (EASE).

Statements or opinions expressed in the manuscripts published in Diagnostic and Interventional Radiology reflect the views of the author(s) and not the opinions of the editors, the editorial board, or the publisher; the editors, the editorial board, and the publisher disclaim any responsibility or liability for such materials. The final responsibility in regard to the published content rests with the authors.

Submitting manuscripts
• Authors should submit manuscripts using the online peer review system that can be accessed through the DIR web site (www.dirjournal.org) or using the direct link at https://mc04.manuscriptcentral.com/dir.
• Detailed DIR Author Guidelines can be viewed or downloaded from DIR web site (www.dirjournal.org).
• Diagnostic and Interventional Radiology requires authors to submit an Authorship Contributions Form during the initial submission which is available for download through the journal’s web page.
• Submitted manuscripts should be original contributions; they should not contain any previously published data or be under consideration by another journal.
• Authors are required to make a full statement at the time of submission about all prior reports and submissions that might be considered duplicate or redundant publication and mention any previously published abstracts for meeting presentations that contain partial or similar material in the cover letter.
• Authors must obtain written permission from the copyright owner to reproduce previously published figures, tables, or any other material in both print and electronic formats and present it during submission.

Copyright transfer
Diagnostic and Interventional Radiology requires each submission to be accompanied by a Copyright Transfer Form which can be downloaded from http://www.dirjournal.org. By signing the copyright agreement, the authors hand over the copyright of their work to the Turkish Society of Radiology. In case of a rejection decision, copyright of the manuscript will be returned to the authors.

Conflict of interest disclosure
Diagnostic and Interventional Radiology requires and encourages the authors and the individuals involved in the evaluation process to disclose any existing or potential conflicts of interests including financial, consultant, institutional, and other relationships that might lead to bias or a conflict of interest. Each contributing author is required to electronically fill in the ICMJE Form for Disclosure of Potential Conflicts of Interest (available at www.icmje.org) and the forms must be submitted during the initial submission.

Initial evaluation and the peer review process
Manuscripts submitted to Diagnostic and Interventional Radiology will first go through a technical evaluation process where the editorial office staff will ensure that the manuscript is prepared and submitted in accordance with the journal’s guidelines. Submissions that do not conform to the journal’s guidelines will be returned to the submitting author with technical correction requests.

All submissions are screened by a similarity detection software (iThenticate by CrossCheck), and those with an overall similarity index of greater than 20%, or duplication rate at or higher than 5% with a single source are returned to the authors without further evaluation along with the similarity report.

Manuscripts that conform to the journal’s guidelines will be reviewed by at least two external and independent peer reviewers during the evaluation process. Originality, high scientific quality, and citation potential of the manuscript are the most important criteria to be accepted for publication. The Section Editor and Editor in Chief are the final authority in the decision-making process for all submissions.

Permissions and reprints
Turkish Society of Radiology handles all requests to reproduce material from Diagnostic and Interventional Radiology. For your convenience, please fill in the permission request form, available for download at the journal’s webpage and e-mail a scanned version to info@dirjournal.org.

Please ensure that you include the full reference of the material you want to use (i.e., year of publication, volume, issue and page numbers, author names, figure numbers where appropriate). Turkish Society of Radiology also requires a detailed overview of how you intend to use the material (i.e., in a book or a journal) and when.

### ACKNOWLEDGEMENT OF REVIEWERS

1 Editor's Recognition Awards and acknowledgements.  
   M. Seçil

### ABDOMINAL RADIOLOGY

5 Pictorial essay. Pancreas ductal adenocarcinoma with cystic features on cross-sectional imaging: radiologic-pathologic correlation.  
   S. Y. Youn, S. E. Rha, E. S. Jung, I. S. Lee

### BREAST IMAGING

12 Original article. Impact of an abbreviated protocol for breast MRI in diagnostic accuracy.  
   G. Oldrini, I. Derraz, J. Salleron, F. Marchal, P. Henrot

### INTERVENTIONAL RADIOLOGY

17 Original article. Percutaneous nephrolithotripsy: C-arm CT with 3D virtual navigation in non-dilated renal collecting systems.  
   D. Jiao, Z. Zhang, Z. Sun, Y. Wang, X. Han

23 Original article. Acute lower gastrointestinal bleeding: predictive factors and clinical outcome for the patients who needed first-time mesenteric conventional angiography.  

28 Original article. Does doxorubicin survive thermal ablation? Results of an ex vivo bench top study.  
   J. D. Morrison, C. K. Schlager, A. E. Lee, R. B. van Bremmen, R. C. Gaba

31 Original article. A comparison between 915 MHz and 2450 MHz microwave ablation systems for the treatment of small diameter lung metastases.  
   T. J. Vogl, A. Roman, N-E. A. Nour-Eldin, W. Hohenforst-Schmidt, I. Bednarova, B. Kaltenbach

38 Technical note. Single-access liver floss technique with antegrade hepatic vein access and recanalization in Budd-Chiari syndrome.  
   J. J. Weaver, E. M. Dobrow, E. K. Hsu, E. J. Monroe

   M. Khayat, J. S. Hussain, J. F. B. Chick, A. N. Hage, R. N. Srinivasan

### MODALITY-BASED (US, CT, MRI, PET-CT) IMAGING

46 Original article. Multiparametric MRI for the detection of local recurrence of prostate cancer in the setting of biochemical recurrence after low dose rate brachytherapy.  

### NEURORADIOLOGY

54 Original article. Prevalence of hyperdense paraspinal vein sign in patients with spontaneous intracranial hypotension without dural CSF leak on standard CT myelography.  

### LETTER TO THE EDITOR

60 Endometrioma of the sigmoid colon presenting with intestinal obstruction.  
   M.K. Demir, T. Orug, R.N. Bayik
