Diagnostic and Interventional Radiology is published bimonthly by the Turkish Society of Radiology. It is peer-reviewed and adheres to the highest ethical and editorial standards. The editors of the journal endorse the Editorial Policy Statements Approved by the Council of Science Editors Board of Directors (www.councilscienceeditors.org/services/draft_approved.cfm). The journal is in compliance with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals published by the International Committee of Medical Journal Editors (updated December 2014, www.icmje.org).

An electronic edition of Diagnostic and Interventional Radiology is available at www.dirjournal.org (ISSN 1305-3825 / EISSN 1305-3612).

First ten volumes of Diagnostic and Interventional Radiology have been published in Turkish under the name of Tanısal ve Girişimsel Radyoloji (Index Medicus® abbreviation: Tani Girisim Radyol), the current title's exact Turkish translation.

© All rights of the articles published in Diagnostic and Interventional Radiology and displayed online at www.dirjournal.org are reserved by the Turkish Society of Radiology.

Diagnostic and Interventional Radiology is indexed in Science Citation Index Expanded, PubMed/MEDLINE, EMBASE®, SCOPUS®, DOAJ and the Turkish Medical Index.

Printed in Turkey
Printed on acid-free paper

Turkish Society of Radiology is one of the foremost medical specialty organizations in Turkey. It was formed by the merger of the two main radiology societies of Turkey, one of which was founded in 1924. The Society is based in Ankara, Turkey.
Instructions for Authors

Manuscript submission is online at www.dirjournal.org. Please refer to the detailed Instructions for Authors at www.dirjournal.org and use them as a checklist.

Scope

Diagnostic and Interventional Radiology is a medium for disseminating scientific information based on research, clinical experience, and observations pertaining to diagnostic and interventional radiology.

- This journal is in compliance with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals, as published by the International Committee of Medical Journal Editors (updated December 2014, www.icmje.org). Any clinical trials must be registered as outlined in the KEME guidelines.

- For studies reporting diagnostic accuracy, please refer to the Standards for Reporting of Diagnostic Accuracy (STARD) checklist at www.stard-statement.org/.

The author(s) MUST sign, scan and submit the Copyright Transfer Form that is assigned to the Diagnostic and Interventional Radiology journal at initial submission. Otherwise online or print publication will not be made.

Fax +90-312-4423654

Form of manuscript

Papers must be in English and presented in the following order:
- Title of the manuscript
- Abstract (250 words or less, structured for original articles)
- Text of paper
- Acknowledgements
- Main points
- Conflict of interest disclosure
- References
- Tables (numbered with Arabic numerals; 1, 2, 3, etc.), prepared on separate sheets
- Figure legends (numbered consecutively using Arabic numerals)

Please use appropriate subheadings and arrange your text as follows:

Abstract

The abstract should contain four sections (for original articles only): Purpose; Methods; Results; Conclusion. Each section should comprise one paragraph, beginning with the name of the section in uppercase letters, followed by a colon: (PURPOSE: We aimed to report examples of ...)

Introduction

State briefly the nature and purpose of the work, quoting the relevant literature.

Methods

Include the details of clinical and technical procedures.

Research ethics standards compliance

All manuscripts dealing with human subjects must contain a statement indicating that the study was approved by the Institutional Review Board or comparable formal research ethics review committee. If none is present at your institution, there should be a statement that the research was performed according to the Declaration of Helsinki principles (www.wma.net/e/policy/b3.htm). There should also be a statement about whether informed consent was obtained from research subjects.

Results

Present these clearly, concisely, and without comment.

Discussion

Explain your results and relate them to those of other authors; define their significance for clinical practice.

Main points

“Main Points” should emphasize the most striking results of the study and highlight the message that is intended to be conveyed to the readers. These points should be constructed in a way which provides the readers with a general overview of the article and enables them to have a general idea about the article.

References

Only essential references should be cited. If there are six or fewer authors, all should be listed. If there are seven or more, list the first three and then “et al.” the rest. The list should be in order of first appearance in the text. Only numerals should be cited in the text. Journal names should be abbreviated according to MEDLINE (http://www.ncbi.nlm.nih.gov/journals/toi?id=sidebars).

Journal article

Books

Tables

Tables should have a title and footnotes explaining any abbreviation used in that table. Lowercase letters (a, b, c, ...) should be used for referenced footnotes.

Figures

All figures should be cited in the text and figure parts should be identified by lowercase letters (e.g., “Figure 1a”). Graphs and drawings are regarded as figures.

Electronic formats

Scan resolution: Scanned line drawings should be digitized with a minimum resolution of 600 dpi relative to the final figure size. For digital halftones, 300 dpi is usually sufficient.

Color illustrations: Store color illustrations as RGB (8 bits per channel) in TIF format.

Vector graphics: Fonts used in vector graphics must be included. Do not draw with hairlines. The minimum line width is 0.2 mm (i.e., 0.567 pt) relative to the final size. Vector graphics exported from a drawing program should be stored in EPS format; the EPS file must always contain a preview of the figure in TIF. Suitable drawing programs include Freehand, Illustrator, Corel Draw, and Designer.

This journal is in compliance with the Recommendations for the Conduct, Reporting, Editing and Publication of Scholarly Work in Medical Journals, as published by the International Committee of Medical Journal Editors (updated December 2014, www.icmje.org).
Contents

ABDOMINAL IMAGING

368 Original article. Added value of diffusion-weighted MRI in detection of cervical cancer recurrence: comparison with morphologic and dynamic contrast-enhanced MRI sequences. R. Lucas, J. L. Dias, T. M. Cunha

382 Short communication. PIRADS 2.0: what is new? B. Turkbey, P. L. Choyke

CHEST IMAGING

385 Original article. Longitudinal evolution of incidentally detected solitary pure ground-glass nodules on CT: relation to clinical metrics. M. Silva, A. A. Bankier, F. Centra, D. Colombi, L. Ampollini, P. Carbognani, N. Sverzellati

391 Original article. CT-guided fine-needle localization of ground-glass nodules in re-aerated lung specimens: localization of solitary small nodules or multiple nodules within the same lobe. M. Li, G. Shen, F. Gao, X. Zheng, Y. Hua, L. Xiao

HEAD AND NECK IMAGING

397 Original article. Apparent diffusion coefficient for discriminating metastatic lymph nodes in patients with squamous cell carcinoma of the head and neck. Y. Pekçevik, İ. Çukurova, I. B. Arslan

INTERVENTIONAL RADIOLOGY

403 Original article. Comparative study of the corrosion behavior of peripheral stents in an accelerated corrosion model: experimental in vitro study of 28 metallic vascular endoprostheses. K. J. Paprottka, P. M. Paprottka, M. F. Reiser, T. Waggershauser

410 Original article. The fate of calf perforator veins after saphenous vein laser ablation. U. Ozkan

419 Technical note. A novel technique in the treatment of retroperitoneal lymphatic leakage: direct percutaneous embolization through the leakage pouch. H. Dinç, Ş. Oğuz, A. Sari

NEURORADIOLOGY

423 Original article. Effectiveness of second-opinion radiology consultations to reassess the cervical spine CT scans: a study on trauma patients referred to a tertiary-care hospital. O. Khalilzadeh, M. Rahimian, V. Batchu, H. V. Vadvala, R. A. Novelline, G. Choy
